Revolta

Open circles sketched in the air, or frames for fabric panels to soften sound. Pendant cylinders have alumimum heads and acrylic diffusers. Create your own custom suspension light combining them individually or with our selection of canopies.

Revolta offers a unique and decorative solution to soften room noise with fabric-covered acoustic panels of sound-absorptive foam. Revolta can also be used to divide large spaces into discrete areas.

JUSTICE DESIGN

Decorative Focus

betacalco

Starburst Quad

Starburst is a collection of kinetic pendants that when in compact form are semblant of stars which can then manually expand into a larger circle, triangle, or quad.

Starburst can adapt to either organic or cosmic interior designs.

wakaNINE

Truk Copper Pendant Light

From Stephen Pikus Design in South Africa, the TRuK range is what we like to call "perfectly imperfect". The fixtures began life as air filters with some spending 10,000 hours, or more, under the hood of a diesel engine haul truck, digger, etc. The filters have been given new life and beauty as they are repurposed, refinished and upcycled to become light fixtures. Because of their rough beginnings, the fixtures may show small blemishes, nicks and scars. We reject those that are ultimately too damaged, but you should expect that TRuK fixtures will not be 100% pristine. This is part of their beauty – like humans, the fixtures retain hints of a past life and each one is perfectly unique.

TRuK

wakaNINE
Beautiful. Human. Illumination.

Modern Forms

Riddle

Riddle's intricate pattern and joinery is no joke.
Our expert craftsmen use a special wet-etching process
to create a textural motif that looks like a mash up of
Sol Lewitt and the complex geometric shapes of Islamic
architecture. Inside, an acrylic diffuser shields the
high- performance LED modules to create a glare-free
illumination, which peekaboo's through the etchings and
creates stunning patterns on the nearest surface.
A true statement piece with a bold black finish.
